 - Core material with Industry focus flexibility
 - Certified dealer instructor delivery quality/standards
 - Knowledge & skill assessments

Operator Training Services

- **Competent Operator Training (Level I)**
 - Course is designed for entry level individuals interested in a career as a Heavy Equipment Operator.
 - Operator safety awareness, basic machine familiarization training and an introduction to earthmoving fundamentals on a variety of machine families.
 - Level I training provides a base foundation and along with additional "stick time", an individual can develop their skills to operate safely and proficiently.
 - Attendees receive a Certificate of Completion at the conclusion of the training session.
 - Minimum of 4 students/course, with a focus on 1-2 machine families in general or specific industry applications.
- **Professional Operator Training (Level II)**
 - Refinement and enhancement of experienced operator skills. Course focus remains on; safety, maintenance inspections, monitoring systems, control familiarization, operating techniques, and applications – but includes much more time in supervised equipment operation ("stick time").
