

# KING **OF** THE JUNGLE

WITH TIGHT MANEUVERABILITY AND UNMATCHED DURABILITY,  
**CAT® FORESTRY MACHINES RULE THE FOREST.**

**Louisiana**

# LIGHT ON THEIR FEET

Whether you need a harvester, feller buncher or forestry machine, Caterpillar® forestry products provide unprecedented stability and agility. From large to small, Cat machines are designed with the type of weight distribution and balance that allows them to move in, around and over rough terrain with ease.

Yet, Cat machines are known for their meager appetite. You'll burn less fuel and get more power, thanks to Caterpillar's advances in engine technology and machine design.

## CLEAN, QUIET POWER

Cat electronically controlled ACERT engines deliver exceptional power and fuel efficiency that is unmatched in the industry. Designed for high performance in all forestry applications, they also meet all current U.S. EPA emission standards — ensuring the safety of their "jungle" environment.

Cat noise-reduction technologies let you work quieter in the woods, too. Depending upon the model, Cat engineers have utilized everything from rubber-isolating engine mounts and on-demand cooling fans to engine and powertrain refinements to reduce operating noise.

## FLEX SOME MUSCLE

Torque, traction and agility only go so far in a forestry application. Fortunately, Cat machines are equally adept at flexing their hydraulic muscle when the real work begins.

Our Cat Feller Bunchers, for example, feature PowerDirect Plus, a new system that optimizes the machine's performance by monitoring operator and attachment demand and delivering power where and when it is needed. Others feature a hydraulic cross-sensing system that improves productivity with faster implement speeds and quicker, stronger pivot turns.

No matter the machine or the model, Cat® hydraulics provide the power and control needed for a variety of applications.

## UNMATCHED DEALER SUPPORT

A quality machine will only take you so far in Louisiana's "jungles", pine plantations and woodlots. Fortunately, Louisiana Cat not only offers the best forestry equipment in the business, but stands behind it with reliable and unrivaled dealer support, factory trained technicians and fully equipped facilities.
