

# ONE SOURCE

FOR ALL OF YOUR CONSTRUCTION & MAINTENANCE NEEDS

## RESOURCE SERVICE GROUP IS YOUR SINGLE SOURCE FOR BOTH SHOP AND FIELD PROJECTS

We offer vast knowledge and experience in all types of plant, mill, and mining maintenance, as well as new construction, refurbishment, and relocation of equipment.

Our facility in Bossier City offers full machine shop capabilities, as well as industrial mechanical services and complete fabrication facilities.

### IN-SHOP

**Some of the services we can provide at our site are:**

- ▶ Gearbox and speed reducer reconditioning
- ▶ Reverse component engineering
- ▶ Parts reconditioning and manufacturing
- ▶ Bore line machining
- ▶ Split line milling
- ▶ Professional assembly
- ▶ Welding repairs
- ▶ New case fabrication
- ▶ Excavator bucket repair
- ▶ Structural and tubular assembly fabrication and repair
- ▶ M.S.H.A. certified electrical support

**Resource  
Service Group**

*We look forward to working with you on your maintenance and construction projects.*

# ON-SITE

Resource Service Group is pleased to offer the following on-site machining services:

## Surface milling, from small portable to 6000 lb. self-propelled surface mill

Capable of gear case split lines, motor base pads, to large excavator bearing rail surfaces.

## Boring and alignment auditing

From 2¼", 3½", 4", 5", 6" and 8" diameter bars, up to 14' long. Capable of working multiple stage gear train bores concurrently.

## Onsite drilling

From small Milwaukee to large Lamina magnetic based drills for most field drilling and tapping.

## Other Services

Millwright and industrial mechanical. Gear box assembly.

## HEAVY INDUSTRIAL RIGGING

- Equipment moves
- Gearing change outs
- Fully stocked mobile tool and field office trailer

We also provide full service precision optical and enclosed frame motor alignment services, and onsite fabrication and welding repair, complete with all required equipment.

Please feel free to contact our office, or one of the contacts listed.
