

WORK SMART. WORK SAFE.

Louisiana Cat Operator Training

EQUIPMENT TRAINING SOLUTIONS

THE TOTAL PACKAGE FOR HEAVY EQUIPMENT OPERATOR TRAINING & SAFETY

Instructor-led Training Programs ... take your best operators and make them better.

Machine Operator Training

Machine operator training is broken down into a familiarization module that is model specific and three operator progression levels. These progression courses begin with teaching basic operating techniques for entry level operators and later work on sharpening the skills of the more advanced machine operators. Benefits include:

- Increased operator efficiency
- Increased operator awareness
- Decreased operator accidents
- Reduced downtime and operating costs
- Better company safety ratings

Level I – Competent Operator Training

This course is designed for entry-level, untrained operators interested in or pursuing a career as a heavy equipment operator. It will provide a base foundation for operators to develop their skills to operate equipment safely and proficiently. The focus areas will be:

- Operator safety awareness
- Walk around inspections
- ISO symbols
- Monitoring systems
- Warning categories and operator reactions
- Proper start up and shut down procedures
- Machine controls
- Basic operating techniques

Duration: 1 day – Approx. 8 hours; Max 10 operators per session

Cost: \$1,800* per session

*Pricing is based on customer supplied equipment and training location.

Level II – Professional Operator Training

The focus of this course is to educate and familiarize experienced operators with regards to a specific machine model. It will provide knowledge and understanding of the machines' systems and controls. The training is usually associated with the introduction and/or purchase of a new machine model. The focus areas will be:

- Refining operating techniques
- Learning application tips and information
- Safety and maintenance inspections
- Monitoring systems
- Control familiarization and applications
- Additional supervised equipment operation (stick time)
- Coaching to fine tune experienced operator skills

Duration: 2 days – Approx. 8 hours per day;
Max 4 operators per session

Cost: \$1,875* per operator per session

*Advance notification of at least two (2) weeks required to arrange this training.

Basic Machine Safety and Familiarization

The focus of this course is to educate and familiarize experienced operators with regards to a specific machine model. It will provide knowledge and understanding of the machines' systems and controls. The training is usually associated with the introduction and/or purchase of a new machine model. The focus areas will be:

- Safety
- Walk Around Inspection
- ISO Symbols
- Monitoring System
- Machine Controls

Duration: 1/2 day session – Approx. 4 hours;
Max 10 operators per session

Cost: \$650* plus travel expenses per session

*Pricing is based on customer supplied equipment and training location. Machine rental can be arranged for an additional charge if needed.

e-Learning Operator Training

These training modules are created for beginning operators, technicians, equipment owners and others wanting to learn about machine operating basics. These materials are intended to provide the user with:

- Basic safety, maintenance and operating procedural knowledge
- Knowledge self-check exercises plus a final examination at the end of the program
- Resource section with tailgate safety presentations, operator cabs and controls and links to Caterpillar websites

Simulator Training

New operators gain familiarization and understanding of machine controls and learn proper operating procedures before training on actual machines. A variety of training exercises designed to address each of the skills associated with operating actual machines are represented in different work environments. Experienced operators can also benefit from simulator training by refining skills to increase production levels. The following simulator programs are available:

- Track Type Tractor
- Hydraulic Excavators
- Articulated Trucks

Cost: \$1,100* per day plus delivery, includes instructor.

*Pricing does not include overnight expenses. If required, additional charges will apply.
