## Staff

Mike Truxillo – [mike.truxillo@louisianacat.com](mailto:mike.truxillo@louisianacat.com)  
Corporate Training Manager – New Iberia, Louisiana

Camille Nereaux – [camille.nereaux@louisianacat.com](mailto:camille.nereaux@louisianacat.com)  
Service Training Coordinator

Eric Dupuis – [eric.dupuis@louisianacat.com](mailto:eric.dupuis@louisianacat.com)  
Marine Engine Instructor – Morgan City, Louisiana

Julius Persons – [julius.persons@louisianacat.com](mailto:julius.persons@louisianacat.com)  
Electronics and Machine Instructor – New Iberia, Louisiana

Lucas Vincent – [lucas.vincent@louisianacat.com](mailto:lucas.vincent@louisianacat.com)  
Engine Instructor – New Iberia, Louisiana

Ross Meche – [ross.meche@louisianacat.com](mailto:ross.meche@louisianacat.com)  
Machine Instructor – New Iberia, Louisiana

Randy Tyrone – [randy.tyrone@louisianacat.com](mailto:randy.tyrone@louisianacat.com)

Machine Instructor – Reserve, Louisiana

## Training Facilities

Louisiana Cat  
6111 Port Road  
New Iberia, LA 70560  
(337) 374-1901 - Tel  
(337) 374-1914 - Fax

Louisiana Cat  
9592 Highway 182 East  
Morgan City, LA 70380  
(985) 631-0561 - Tel  
(985) 631-0567 - Fax

## Class Schedules

Upon request, Louisiana Cat will assist each customer in scheduling their requested classes. The current class schedule is posted on our company website at [www.louisianacat.com](http://www.louisianacat.com). Training information can be found under the heading “Parts and Services” or click on the training solutions icon. Then, go to Technician Training to find the 2021 Technician Training Schedule.

## Registration/Enrollment

A completed Registration Form is required per participant. The registration form can be found on our company website at [www.louisianacat.com](http://www.louisianacat.com) as well as on page 5 of this catalog. The completed registration form should be sent to:

**Training@LouisianaCat.com**

(337) 374-1901

(337) 374-1914 Fax

## Course Fees

Course fees are listed next to each course under the available classes section. The fees include the course, handouts, course material on flash drive, and lunch each day with the exception of the last day that classes are held. All classes take place at our training centers located in either Morgan City or New Iberia & begin at 8am.

A cancellation fee applies if notification is not provided in advance of one week prior to the scheduled class date. This late cancellation fee is \$450.00 per participant. If the participant fails to provide advance notification (via email) of enrollment cancellation, the full class fee is due at this time. If Louisiana Cat cancels the class for any reason, no fee will be charged.

\*Today's Date: \_\_\_\_\_

\*Technician Name: \_\_\_\_\_

\*Technician Email Address: \_\_\_\_\_

\*Course Title: \_\_\_\_\_

\*Course Date: \_\_\_\_\_

\*Class Location: \_\_\_\_\_

\*Store Location: \_\_\_\_\_

\*Manager Name: \_\_\_\_\_

\*Manager Phone Number/Email: \_\_\_\_\_

\*Purchase Order Number: \_\_\_\_\_

\*Authorized Signature: \_\_\_\_\_

*\*Required for confirmation of enrollment*

**Forward all training enrollments to:**

[training@louisianacat.com](mailto:training@louisianacat.com)  
(337) 374-1901

- Lodging and transportation are not included
- Lunch will be provided except on the last day of classes if the last day is a ½ day.
- Louisiana Cat reserves the right to cancel any class at their discretion if fewer than four (4) participants are enrolled.

### **Safety Equipment/Proper Attire**

Participants must bring approved safety glasses with side shields and wear steel toe shoes. Classes involve hands-on lab activities, and suitable attire is required; short pants, sleeveless shirts and canvas tennis shoes are not allowed. Participants dressed inappropriately will not be able to participate in exercises, and will not receive qualification credentials. No reimbursement will be given for class costs.

---

## Dealer Performance Center (DPC)

---

**Dealer Performance Center** (or DPC) is our online training website. Using our online training website, you will experience easy to use engaging videos and interactive training, all with the click of a mouse. By taking our suggested learning classes online, you will increase the value of your training. Our online courses are available 24 hours a day, 7 days a week and are also available in various languages. We suggest that you take our “Suggested Self Study” classes online prior to attending our Instructor-Led courses to increase the value of your training.

DPC is a best in class solution for all training and development needs. The goal is to offer Caterpillar dealers and customers a one-source solution for learning and development. All tools necessary to organize and launch an effective learning plan can be found in DPC while keeping track of all course transcript details in one place. Flexibility and ease of use are just some of the benefits.

### How It Works:

- A subscription is required to access DPC
- Subscriptions can be purchased **per individual** user at a cost of **\$300 per individual per year**
- Individual subscriptions are valid for one year from the date of activation, and does not renew automatically
- A DPC Subscription gives the learner access to a number of web-based courses

### In order to fully process a DPC request, we will need:

- Student Name
- Company Name
- Company Physical Address
- Company Mailing Address
- Company Phone Number
- Company Parish/County
  - Please note that for new subscriptions, it takes approximately 7-10 business days to successfully activate. Once activated, you will receive notification from the Louisiana Cat DPC Administrator that the accounts have been activated, the login information for each account, and a helpful user guide for each individual.

Currently, Louisiana Cat offers some Instructor-Led Courses that require DPC access as a prerequisite. Those courses are as follows: **AFA I, AFA II, D3500 Engine Master Mechanic, D3600 Engine Master Mechanic, G3600 Master Mechanic, G3600 Engine Repair, and Electronics Fundamentals & Troubleshooting ILT.** Please note that for **AFA I, Electronics Fundamentals, Engine Diagnostics and Performance Based Gas Engines** there are online courses that need to be completed as well within DPC prior to attending the class.

---

## Electronics Fundamentals

---

**COURSE NUMBER:** 52664

**CLASS DESCRIPTION:**

This course was formerly listed as Electronics Troubleshooting 1; Course # 26679 in DPC. This is a foundational course to aid mechanical technicians in transition to electrical and electronic systems repair. This course teaches participants the procedures for maximizing battery life and reducing operational costs while reducing the environmental impact in disposing of spent batteries. Each participant is provided hands-on experience with electrical tools used to diagnose circuit faults and understand the effects of open and shorted conductors. It also includes hands-on testing of various charging and starting systems in the lab facility.

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Identify safety concerns related to electrical energy for the prevention of accidental exposure, equipment damage and injury
- Identify and service connectors
- Identify types of electrical circuits: series, parallel and series/parallel
- Navigate and interpret schematics
- Explain pull-up voltage and its function in a circuit
- Use service resources to troubleshoot diagnostic codes and diagnose input/output circuits
- Review and use the information within Ugly's electrical handbook
- Utilize Ohm's Law, measure and calculate I, E and R in electrical circuits
- Repair wiring harness utilizing Caterpillar wiring and terminal repair kits
- Identify the effects of opens and/or unwanted path to ground within a circuit
- Identify operation and maintenance concerns that shorten battery life and perform maintenance procedures that do not shorten battery life
- Explain the importance of proper electrolyte concentrations
- Measure a battery's level of charge and properly recharge the battery without shortening its operational life
- Explain the sign wave signal produced within the alternator and how the signal is transformed into DC voltage
- Measure current draw at various starting system circuits and compare to specification for diagnosing system faults
- Assemble electrical circuits on a training aid & measure electrical circuits using DMM
- Identify basic components & apply Ohm's Law to solve unknown circuit values
- Diagnose basic circuit faults
- Identify inputs and outputs and measure their signals
- Navigate and interpret schematics
- Use service resources to correctly diagnose battery, starter & alternator faults
- Successfully flash an ECM using ET

**REQUIRED EQUIPMENT:** Safety glasses with side shields, gloves, safety footwear, and long pants.

**PREREQUISITES:**

**Suggested Self Study - Web based classes available in DPC**

- ELE C01 - Key features of Electricity - 40113
- ELE C02 - Electrical Schematics -40114
- ELE C03 - Measuring Electrical Circuits - 40115
- ELE C04 - Electrical Circuit Types - 40018
- ELE C05 - Electrical Circuit Faults - 40017
- ELE C06 - Wire Connectors - 40016
- ELE C07 - Wire Types, Terminals and Harnesses - 40015
- ELE C08 - Circuit Devices - 40013
- ELE C09 - Circuit Protection Devices - 40014
- ELE C10 - Electrical Motors - 40028
- ELE C11 - Semi-Conductors - 40012
- ELE C12.1 - Electrical Circuit Inputs: Switches - 40019
- ELE C12.2 - Position Sensors - 40029
- ELE C12.3 - Electrical Circuit Inputs: Temp.& Pressure Sensors - 40042
- ELE C12.4 - Electrical Circuit Inputs: Speed/Timing Sensors - 40030
- ELE C13 - Circuit Processors - 40031
- ELE C14 - Circuit Outputs: Components – 40027
- ELE C15 - Battery System – 40026
- ELE C16 - Starting System – 40041
- ELE C17 - Charging System – 40062

**COURSE DURATION:** 4.5 Days; 36 Hours

**COURSE COST:** \$2,175.00 USD per participant

\* **DPC Subscription Required**

---

## Electronics Troubleshooting ILT

---

**COURSE NUMBER:** 52647

**CLASS DESCRIPTION:**

This course is a redesigned version of Electronics Troubleshooting 1 (DPC # 26679) that offers a higher ratio of hands-on labs for skills development. This new version provides the learner with various fault scenarios for analyzing proper component operation and system response under different failure mode conditions. With an emphasis on the troubleshooting procedures, the most critical FMI codes will be reviewed and discussed, -3, -4, -5, -6, -8, -9, and -14.

Given this course is heavily on hands-on skills development, the participant should have working knowledge of basic circuits, circuit faults, multi-meter use, electrical schematics interpretation, basic Cat ET, and servicing connector prior to attending this course.

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Troubleshoot ECU's
- Troubleshoot CAN and CDL datalinks using volts and resistance
- Troubleshoot fault codes related to input circuits
- Troubleshoot fault codes related to output circuits

**PREREQUISITES:** Electronics Fundamentals – 52664 ILT

**COURSE DURATION:** 4.5 Days; 36 Hours

**COURSE COST:** \$2,175.00 USD per participant

\* **DPC Subscription Required**

## Electronic Sensors & Control Logics

---

**COURSE NUMBER:** 40807

**CLASS DESCRIPTION:**

This course is an in depth study of effective techniques utilized for troubleshooting Caterpillar electronic engine control systems. The course will cover electronic components and their functions for all electronic systems. It will teach the use of the diagnostic tooling required to troubleshoot and repair electronic engine systems, basic troubleshooting techniques, and basic control logics. Engines covered will include 3116, 3126 HEUI, 3176/3176B, C-10, C-12, C-15 and 3406 B/C/E.

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Recognize engine components and understand their functions
- Recognize and use service and diagnostic tooling (Service Technician Workbench, ET, Flash)
- Obtain factory passwords
- Establish program parameters
- Calibrate and adjust electronic engine components
- Troubleshoot electronic systems, differentiating electrical hardware and harness problems from electronics
- Describe the troubleshooting process
- Troubleshoot and repair electronic engine control systems.
- Diagnose and repair intermittent problems
- Isolate mechanical, OEM and perceived problems
- Demonstrate a working knowledge of:
  - Service Information System (SIS)
  - Electronic Technician (ET)
  - Flash procedures
- Use Cat Tooling to repair any harness problems

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:**

**Instructor Led Course**

- Electronics Fundamentals – 52664 ILT
- Electronics Troubleshooting ILT – 52647 (54226 equivalent)

**COURSE DURATION:** 4.5 Days; 36 Hours

**COURSE COST:** \$2,175.00 USD per participant

---

## Hydraulics Troubleshooting

---

**COURSE NUMBER:** 40810

**CLASS DESCRIPTION:**

This course is designed to familiarize the participant with basic hydraulics tests and inspection techniques required to demonstrate diagnostic procedures with hydraulic concerns.

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Outline the safety procedures to follow when working or checking high-pressure hydraulics
- Identify hydraulic symbols relating to Cat products
- Explain how to use a hydraulic schematic, to understand graphic symbols and how they are used in the make-up of a hydraulic schematic
- Explain the fundamental principles of pressure and flow, describe the operation of basic hydraulic components and explain how these components are combined to do their many jobs

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:**

**Suggested Self Study - Web based classes available in DPC**

- Hydraulic System Fundamentals - 20323

**Instructor Led Courses**

- Electronics Fundamentals – 52664
- Electronics Troubleshooting ILT - 52647 (54226 equivalent)
- Electronic Sensors and Control Logics - 40807

**CLASS DURATION:** 4.5 Days; 36 Hours

**CLASS COST:** \$2,175.00 USD per participant

---

## Powertrain Troubleshooting

---

**COURSE NUMBER:** 40811

**CLASS DESCRIPTION:**

This course covers basic powertrain theory, studying the various components used in Caterpillar equipment. The topics include, but are not limited to, the transmissions and differentials, torque converters, final drives and axles.

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Identify powertrain components
- Discuss system operations and component functions
- Locate pressure testing ports and specifications
- Demonstrate safety procedures for working on or checking powertrain systems included

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:**

**Instructor Led Courses**

- Electronics Fundamentals – 52664
- Electronics Troubleshooting ILT - 52647 (54226 equivalent)
- Electronic Sensors and Control Logics - 40807
- Hydraulics Troubleshooting - 40810

**COURSE DURATION:** 4.5 Days; 36 Hours

**COURSE COST:** \$2,175.00 USD per participant

## Hydraulic Hammer Training

---

**COURSE NUMBER:** 54464

**CLASS DESCRIPTION:**

This course is designed to familiarize the participant with Pre Delivery Inspection (PDI) procedures as well as maintenance, disassembly, assembly and charging procedure

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Perform Pre-Delivery Inspection
- Maintenance and inspection while hammer is in use
- Disassembly and assembly procedure
- Pressure relieving and charging of the accumulators

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:**

**Instructor Led Courses**

- Electronic Fundamentals – 52664
- Electronic Troubleshooting ILT – 52647
- Electronic Sensors & Control Logic – 40807
- Basic Hydraulic Troubleshooting - 40810

**COURSE DURATION:** 3 Days; 24 Hours

**COURSE COST:** \$1,675.00 USD per participant

---

## Air Conditioning Troubleshooting

---

**COURSE NUMBER:** 40806

**CLASS DESCRIPTION:**

This course is designed to introduce the technician to the basic principles and theories of air conditioning in relation to Caterpillar equipment.

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Understand basic fundamentals of AC systems, identification of system components and component functions
- Utilize tooling to inspect and test operating air conditioner system on various Caterpillar machines
- Understand governmental laws, safety and handling concerns of air conditioning refrigerant
- Perform the efficient process for refrigerant recovery and charging of an air conditioner system
- Effectively execute charging and recharging of the air conditioning system

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:** None

**COURSE DURATION:** 3 Days; 24 Hours

**COURSE COST:** \$1,675.00 USD per participant

---

## Fuel Systems Troubleshooting

---

**COURSE NUMBER:** 40808

**CLASS DESCRIPTION:**

This course is an in-depth study of Caterpillar fuel systems for 3114, 3116, 3126, C7 & C9 series engines and the C10/C12, C15 and 3400 series engines. Participants learn fuel system disassembly and assembly procedures. Participants study Caterpillar pumps, governors, timing advance units, unit injectors and nozzles.

**LEARNING OBJECTIVES:** Upon completion, the participant will be able to:

- Explain the operating principals of the 3116, 3126, C-7, C-9 unit injector, Hydraulically Actuated Electronically Controlled Unit Injection (HEUI), and ACERT technology
- Explain the operation of current and new scroll fuel systems 3406, 3400-V
- Explain the operation of the C/10/12, 3406E, C15, 3400-V High performance, and 3400 HEUI fuel systems and ACERT technology
- Demonstrate the operation and adjustment of 3116, 3126, C7 & C9 fuel systems
- Correctly determine API fuel density
- Inspect 3116 unit injectors for damage
- Check and adjust 3116 and HEUI fuel settings
- Check and adjust 1.1 unit injector synchronization, rack setting and timing
- Evaluate how API fuel density affects performance
- Demonstrate the operation and adjustments of C15 and 3400-V fuel Systems.
- Check and adjust set point and low idle
- Check and adjust fuel settings
- Check injection tinting
- Test unit injectors and nozzles

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:**

**Suggested Self Study - Web based classes available in DPC**

- 7 Step Diagnostic Process Course - 26917
- C15 ACERT Engine Performance Course - 26915
- Engine Performance Diagnostic Exercise 21 - 25946
- C-9 Engine Performance Course - 26916
- Engine Performance Diagnostic Exercise 18B - 25906
- Cat 3116 Engine Performance Course - 26848
- Cat 3406 and 3054 Engine Performance Course - 26949

**Instructor Led Courses**

- Electronics Fundamentals – 52664
- Electronics Troubleshooting ILT - 52647 (54226 equivalent)
- Electronic Sensors and Control Logics - 40807

**CLASS DURATION:** 4.5 Days; 36 Hours

**CLASS COST:** \$2,175.00 USD per participant

---

## Engine Diagnostics

---

**COURSE NUMBER:** 40921

**CLASS DESCRIPTION:**

This course is an in-depth study of engine diagnostic and repair techniques. The majority of the class time is spent with hands-on activities, diagnosing and correcting engine problems.

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Explain the operating principals of the 3116, 3126; C-7, C-9 unit injector, and HEUI fuel systems
- Demonstrate the operation and adjustment of 3116, 3126, C-7 & C-9 fuel systems
- Explain the use of diagnostic tools to perform basic troubleshooting on engine systems
- Measure and evaluate temperature and pressures of an operating engine
- Measure and evaluate inlet and exhaust manifold pressures and temperatures
- Determine the effects on the engine set point and engine performance by changing fuel settings, high idle, and timing

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:** Suggested Self Study - Web based classes available in DPC

- C15 ACERT Engine Performance Course - 26915
- Engine Repair Diagnostic Exercise 17 - 26266
- Engine Performance Diagnostic Exercise 20 - 26920
- Engine Performance Diagnostic Exercise 21 - 25946
- EP C05 – Cat C-9 Engine Electronic Control System - 26916
- Engine Performance Diagnostic Exercise 18B - 25906
- EP C03 – Cat 3116 MUI Fuel System - 26848
- Cat 3406 and 3054 Engine Performance Course - 26949
- ER C01 - Cat Diesel Engines - 41134
- ER C06 - Diesel Engine Crankshaft - 40436
- ER C07 - Diesel Engine Front Gear Train - 41300
- ER C09 - Diesel Engine Connecting Rod Assembly - 41301
- ER C12 - Cat Diesel Engine Lubrication System - 41304
- ER C13 - Cat Diesel Engine Oil Pumps - 41305

**Instructor Led Courses**

- Electronics Fundamentals – 52664
- Electronics Troubleshooting ILT - 52647 (54226 equivalent)
- Electronic Sensors and Control Logics – 40807 ILT
- Fuel Systems Troubleshooting – 40808 ILT

**CLASS DURATION:** 4.5 Days; 36 Hours

**CLASS COST:** \$2,175.00 USD per participant

---

## D3500 Engine Operation, Maintenance & Electrical

---

**COURSE NUMBER:** 41875

**CLASS DESCRIPTION:**

This course covers air, lubrication, cooling and fuel engine systems. Lab activities include the Caterpillar software program, Electronic Technician, on the D3500 Electronic engines.

**LEARNING OBJECTIVES:**

Upon completion, the participant will understand:

- Engine systems
- Basic maintenance and troubleshooting on D3500 electronic engine
- Be able to set valves and injectors on a D3500 engine
- Use the electronic instrument panel
- Use the Caterpillar ET program
- Read and decipher electronic codes
- Basic D3500 electronics

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:** None

**COURSE DURATION:** 2.5 Days; 20 Hours

**COURSE COST:** \$1,675.00 USD per participant

---

## D3500 Engine Master Mechanic\*

---

**COURSE NUMBER:** 41899

**CLASS DESCRIPTION:**

The primary focus of this course is the planned maintenance and repairs for the Caterpillar 3500 A, B, C, and Tier III diesel engines. It involves hands-on iron activities covering troubleshooting techniques, operations and adjustments.

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Understand the operation principles and flow of 3500 engine systems for lubrication, cooling, fuel and air intake / exhaust
- Identify the differences between the 3500 A, B, C, and Tier III Series engines
- Accurately check and set the bridges, valves, injector heights and injector synchronization
- Disassemble and assemble the heads and pistons
- Demonstrate the ability to perform fuel quality (API) correction factors to determine the actual horsepower being produced by an engine
- Remove and install an after cooler, camshaft, and a turbocharger cartridge assembly
- Troubleshoot engine related iron problems.

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:** None

**COURSE DURATION:** 4.5 Days; 36 Hours

**COURSE COST:** \$2,475.00 USD per participant

\* **DPC Subscription Required**

---

## C280 Engine Master Mechanic

---

**COURSE NUMBER:** 40809

**CLASS DESCRIPTION:**

Students will use the special tooling, Electronic Technician, to view and troubleshoot minor electrical problems with engine components. Upon completion, the participant will be able to: Understand basic operating principles of the C280 diesel engine systems. Remove and install a cylinder head, piston, connecting rod and cylinder liner. Remove and install a main bearing. Remove and install a camshaft segment and time the camshaft(s) to the crankshaft. Adjust valves, valve bridges, and the unit injectors. Have a basic understanding of the operation of Unit Injectors. Explain the internal and external flow of engine coolant and lube oil. Service the main and centrifugal oil filters.

**LEARNING OBJECTIVES:**

This course will cover systems operation and teach service procedures unique to the C280 diesel engine. Students will use the special tooling, Electronic Technician, to view and troubleshoot minor electrical problems with engine components. Upon completion, the participant will be able to: Understand basic operating principles of the C280 diesel engine systems. Remove and install a cylinder head, piston, connecting rod and cylinder liner. Remove and install a main bearing. Remove and install a camshaft segment and time the camshaft(s) to the crankshaft. Adjust valves, valve bridges, and the unit injectors. Have a basic understanding of the operation of Unit Injectors. Explain the internal and external flow of engine coolant and lube oil. Service the main and centrifugal oil filters.)

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:**

**Instructor Led Courses**

- Electronic Fundamentals – 52664 ILT
- Electronics Troubleshooting ILT - 52647 (54226 equivalent)
- Electronic Sensors and Control Logics – 40807 ILT

**COURSE DURATION:** 4.5 days; 36 Hours

**COURSE COST:** \$2,300.00 USD per participant

---

## D3600 Engine Master Mechanic\*

---

**COURSE NUMBER:** 26244

**CLASS DESCRIPTION:**

This course covers system operation and teaches service procedures unique to 3606, 3608, 3612, and 3616/C280 Engines. Special tooling is used, which includes hydraulic tensioning equipment, to disassemble, assemble and adjust various engine components.

**LEARNING OBJECTIVES:**

After completion, the participant will be able to: Understand the basic operating principles of the D3600/C280 Engine and Components. Understand use of the Service Manual. Remove and install a cylinder head. Remove and install a piston, connecting rod and cylinder liner. Remove and install a main bearing. Remove and install a camshaft segment and time the camshaft(s) to the crankshaft. Adjust the valves and valve bridges. Synchronize and time the unit injectors. Understand the operating principles of the MUI and EUI fuel system. Check the rack stop setting and synchronize the governor or actuator to the engine. Understand the internal and external flow of engine coolant and lube oil. Service the main and centrifugal oil filters. Understand maintenance procedures and when to perform.)

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:** None

**COURSE DURATION:** 4.5 Days; 36 Hours

**COURSE COST:** \$2,300.00 USD per participant

\* **DPC Subscription Required**

---

## G3600 Master Mechanic\*

---

**COURSE NUMBER:** 26242

**CLASS DESCRIPTION:**

This course covers mechanical service procedures unique to the G3600 gas engine. Special tooling, which includes hydraulic tensioning equipment, is used to disassemble, assemble, and adjust various components. The disassembly and assembly part of this course is similar to the 3600 Diesel Engine Master Mechanic Course (2820). However, the service and adjustment procedures apply only to the gas engines.

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Remove and install a cylinder head.
- Remove and install a piston, connecting rod, and cylinder liner.
- Remove and install a main bearing.
- Remove and install a camshaft segment and time the camshaft to the crankshaft.
- Adjust engine valve bridges, engine valves, and gas admission valves.
- Understand adjustments to the fuel control valve, waste gate, and choke valve linkages.
- Explain the internal and external flow of engine coolant and lube oil and explain temperature control of each system.

This course is designed for those who have a good theoretical and practical understanding of gas fueled engines and correct mechanical procedures.

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:** None

**COURSE DURATION:** 4.5 days; 36 Hours

**COURSE COST:** \$2,300.00 USD per participant

**\*DPC Subscription Required**

---

## G3600 Engine Rebuild\*

---

**COURSE NUMBER:** 55707

**CLASS DESCRIPTION:**

The 3600 Engine Rebuild ILT covers the skills associated with the G3600 Master Mechanic. In addition, the 3600 Engine Rebuild ILT course is designed to focus on major overhauls, engine alignment procedures, principles of failure analysis, and reusability techniques applicable to engine components.

**LEARNING OBJECTIVES:**

Upon completion, the participant will be able to:

- Perform Top-End Overhaul
- Perform In-frame Overhaul.
- Perform engine alignment procedures: end-play and crankshaft deflection
- Perform visual analysis and correct method to handle, protect, and store failed parts.
- Prepare documentation for failure analysis and warranty claims.
- Use the reusability guidelines to identify which component can be reused and under what conditions.

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:** None

**Course Equivalent:** G3600 Master Mechanic

**COURSE DURATION:** 4.5 days; 36 Hours

**COURSE COST:** \$2,300.00 USD per participant

\* **DPC Subscription Required**

## C32 Engine Operation, Maintenance & Electrical

---

**COURSE NUMBER:** 41641

**CLASS DESCRIPTION:**

This course covers product information, air, lubrication, cooling, fuel, engine electronics and monitoring systems, as well as Electronic Technician (ET) software and hardware. Lab activities include the removal and installation of injectors, the installation of injector flash files, and valve and injector adjustments. This course also involves hands-on troubleshooting of a fully functioning C32 engine.

**LEARNING OBJECTIVES:**

After completion, participants will understand:

- Engine systems
- Basic operation, maintenance and troubleshooting on a C32
- Remove and install C32 unit injectors
- Be able to set valves and injectors on a C32
- Use monitoring systems and control panels
- Use Caterpillar ET program
- Read and decipher electronic codes
- Basic electronics of a C32

**COURSE DURATION:** 2.5 Days; 20 Hours

**COURSE COST:** \$1,675.00 USD per participant

## C175 Engine Electrical, Operation & Maintenance

**COURSE NUMBER:** 408115

**CLASS DESCRIPTION:**

This course will teach the CAT C175 Diesel Engine electronic systems, related wiring harness, component hardware and the use of Electronic Technician (ET) on the engine electronic control systems. The emphasis of this course will be to provide the participant with hands on diagnostic troubleshooting of all major systems of a running C175 Diesel Engine.

**LEARNING OBJECTIVES:**

Learning objectives for this course include: ·

- Recognize engine electronic components and their functions
- Describe C175 Software features and configurations
- Use Electronic Technician (ET) to diagnose problems, configure engine parameters, monitor system and make data logging
- Calibrate and adjust electronic engine components
- Troubleshoot electronic system, differentiating electrical hardware and harness problems from electronic problems
- Diagnose and ratify intermittent electrical problems

**REQUIRED EQUIPMENT:** Safety glasses with side shields, safety footwear, and long pants.

**PREREQUISITES:**

**Instructor Led Courses**

- Electronics Fundamentals – 52664 ILT
- Electronics Troubleshooting ILT - 52647 (54226 equivalent)
- Electronic Sensors and Control Logics – 40807 ILT
- Engine Diagnostics – 40921 ILT

**COURSE DURATION:** 2.5 Days, 20 Hours

**COURSE COST:** \$1,675.00 USD per participant

## Marine Engine Systems (Internal)

**COURSE NUMBER:** 40431

**AUDIENCE:**

Dealer technicians and/or dealer application engineers working on the service or installation of marine engines.

**OBJECTIVES:**

Upon completion of the course students will be able to:

- Determine the proper oil selection for Cat marine engines
- Explain the SOS test process
- Explain the requirements of Lube Oil
- Determine the API of diesel fuel
- Determine the A and I guide requirements for marine fuel systems
- Describe the marine engine rating system
- Navigate TMI to retrieve information about a marine engines
- Describe the three basic hull types
- Describe how marine propellers work
- Describe the various types of marine engine cooling systems
- Explain requirements for marine engine coolant
- Describe basic principles for proper ventilation and exhaust system design
- Describe basic principles of marine engine alignment and vibration
- Identify basic types of engine mounting systems

**PREREQUISITES:**

Participants should have a training session on using the Technical Marketing Information (TMI) on-line system prior to attending this module.

**PARTICIPANT RESOURCES:**

Participants should bring his or her Laptop computer; Have access to Caterpillar Technical Marketing Information (TMI)

**ASSESSMENT:**

Given all reference materials, class notes, and the post-test, the participant will be able to answer the questions with 100% accuracy. Student may refer to their module materials and class notes when taking the post-test, however no student collaboration or consulting with other participants will be allowed during the post-test.

**COURSE DURATION:** 2.5 Days; 20 Hours

**COURSE COST:** \$1,675.00 USD per participant

---

## Marine Control Systems (Internal)

---

**COURSE NUMBER:** 41564

**AUDIENCE:**

Level I & II: This module is designed for field service personnel, resident mechanics, technical communicators, marine, shop, & power system technicians. All students should have a working knowledge of basic electrical and electronic systems used within Caterpillar products.

**OBJECTIVES:**

This course is designed to prepare the technician to identify the components and explain the systems operation on the Cat MCS (formerly Auto-Maskin) Alarm and Protection System, Cat MSCS, Multi -Station Control System, and the PL1000E & PL1000T Communication ECM. Level II.

**PREREQUISITES:** Suggested Self Study – Web based classes available in DPC

- Basic Electricity – 21468
- Electrical Circuit Components – 21464
- Electrical/Electronic Components – 26670
- Measuring Electrical Circuits – 40115
- Participants should have a training session on using the Technical Marketing Information (TMI) on-line system prior to attending this module.

**COURSE DURATION:** 3.5 Days; 28 Hours

**ENVIRONMENT:** Classroom and Lab

**REQUIRED EQUIPMENT:**

Laptop computer  
Access to Technical Marketing Information (TMI)  
Texas Instruments 30XA Scientific Calculators (TI-30XA)  
Flash Drive  
Participant Guide  
Binder with Reference materials  
Marine Analyst Service Handbook (MASH) LEBV4830-09

**ASSESSMENT:**

Given all reference material, class notes, and the post-test, the participant will be able to answer the questions with 100% accuracy. Student may refer to their module materials and class notes when taking the post-test. Student may not consult with others during the post-test.

**COURSE COST:** \$1,675.00 USD per participant

---

## Applied Failure Analysis (AFA) I\*

---

**COURSE NUMBER:** 26213

**DESCRIPTION:**

AFA I focuses on the basic principles of metallurgy, wear and fractures, and on managing the failure analysis process itself to arrive at the most probable root cause of failure. Engine parts are generally lower in hardness than drivetrain components so their facts ('road signs') are easier to see ("read"). The course consists of classroom instruction and laboratory exercises, and concludes with case studies of failures that have occurred in the field.

**OBJECTIVES:**

After instruction in these basics, students then learn to apply the fundamentals to the major engine components: Bearings, Crankshafts, Valves, Pistons, Rings, Liners, Connecting Rods, and Threaded Fasteners.

**PREREQUISITES:**

This course has one or more prerequisites that need to be completed and passed before a participant will be allowed to be enrolled in the course. The following web based classes are available in DPC.

- Intro to AFA Principles of Wear – 33402 AICC
- Intro to AFA Principles of Fractures – 33403 AICC
- Intro to AFA Management – 33400 AICC
- Intro to AFA Visual Examination – 33401 AICC
- Intro to AFA Metallurgy – 33407 AICC

**COURSE DURATION:** 4.5 Days; 36 Hours

**COURSE COST:** \$2,150.00 USD per participant

\* **DPC Subscription Required**

---

## Applied Failure Analysis (AFA) II\*

---

**COURSE NUMBER:** 26214

**DESCRIPTION:**

This course begins with a review of the basic principles covered in AFA I. Students apply those principles to gears, anti-friction bearings, hydraulic pumps & motors, lubrication, welds, and shafts. Communicating a failure analysis is more strongly emphasized by including a section of taking good digital pictures. The course wraps up with case studies from the field.

**OBJECTIVES:**

Review Principles of Management, Review of Fractures, Review of Wear, then apply to them to Lubrication Gears, Anti-friction Bearings, Hydraulic Pumps & Motors, Shafts, Welds, and Case Studies.

**PREREQUISITES:**

- AFA I – 26213 ILT

**COURSE DURATION:** 4.5 Days; 36 Hours

**COURSE COST:** \$2,150.00 USD per participant

\* **DPC Subscription Required**

---

## Component Reuse Training\* (Internal)

---

**COURSE NUMBER:** 41658

**DESCRIPTION:**

This course begins with a review of the basic principles covered in AFA I. Students apply those principles to gears, anti-friction bearings, hydraulic pumps & motors, lubrication, welds, and shafts. Communicating a failure analysis is more strongly emphasized by including a section of taking good digital pictures. The course wraps up with case studies from the field.

**OBJECTIVES:**

Review Principles of Management, Review of Fractures, Review of Wear, then apply to them to Lubrication Gears, Anti-friction Bearings, Hydraulic Pumps & Motors, Shafts, Welds, and Case Studies.

**PREREQUISITES:**

This course has one or more prerequisites that need to be completed before any participant will be allowed to be enrolled in this course.

- AFA I must be successfully completed prior to be allowed to register for this course
- Review the appropriate Guidelines for reusable parts and salvage operations
- Applied Failure Analysis I - 26213
- Component Reuse: General Procedures - 44380
- Component Reuse: Hydraulic Pump Components – 44591
- Component Reuse: Hydraulic Pump Group - 44592
- Component Reuse: Drivetrain Discs and Plates - 44891
- Component Reuse: Drivetrain Gears Repair - 44893
- Component Reuse: Drivetrain Planetary Final Drive - 44895
- Component Reuse: Engine Camshaft - 44588
- Component Reuse: Engine Crankshaft - 44589
- Component Reuse: Engine Pistons - 44590
- Reusability Guidelines for Engine Liners - 52894
- Reusability Guidelines for Rocker Arms - 52896
- Reusability Guidelines for Turbochargers – 52895
- Review the appropriate Guidelines for reusable parts and salvage operations

**COURSE DURATION:** 4.5 Days; 36 Hours

**COURSE COST:** \$1,875.00

**\* DPC Subscription Required**

## Product Health Command® Training\* (Internal)

---

**COURSE NUMBER:** xxxxx

**AUDIENCE:**

Level I & II: This module is designed for field service personnel, resident mechanics, technical communicators, marine, shop, & power system technicians. All students should have a working knowledge of basic electrical and electronic systems used within Caterpillar products.

**OBJECTIVES:**

This course is designed to prepare the technician to identify the components and explain the systems operation on the Louisiana Cat Product Health Command® panel. This is an engine control and management system that is designed to control certain 3500, C32 & C18 marine engines. Upon completion of the course, the student will be able to troubleshoot and repair the system. The student will also be able to use remote capabilities to diagnose engine or control panel issues.

**PREREQUISITES:** Suggested Self Study – Web based classes available in DPC

- Basic Electricity – 21468
- Electrical Circuit Components – 21464
- Electrical/Electronic Components – 26670
- Measuring Electrical Circuits – 40115

**COURSE DURATION:** 2 Days; 16 Hours

**ENVIRONMENT:** Classroom and Lab

**REQUIRED EQUIPMENT:**

- Laptop computer
- Flash Drive
- Participant Guide
- Binder with Reference materials

**ASSESSMENT:**

Given all reference material, class notes, and the post-test, the participant will be able to answer the questions with 100% accuracy. Student may refer to their module materials and class notes when taking the post-test. Student may not consult with others during the post-test.

**COURSE COST:** \$1,675.00 USD per participant

## NEW IBERIA / LAFAYETTE AREA HOTELS

Lodging and transportation are not included in course fees.

➤ **Windgate by Wyndham – Lafayette (LFT) airport**

702 E Kaliste Saloom Rd.

Lafayette, LA 70508

Phone: (337) 234-3700

- Shuttle service to and from Lafayette (LFT) airport (call 337-234-3700 upon arrival)
- Offers transportation to and from hotel to training center (\$10.00 per person roundtrip)
- Complimentary breakfast

**International travelers:** If you will not be renting a vehicle, we suggest this hotel for convenience of transportation to and from the training center.

➤ **Homewood Suites by Hilton – Lafayette**

201 Kaliste Saloom Rd.

Lafayette, LA 70508

Phone: (337) 264-6044

- Shuttle service to and from Lafayette (LFT) airport
- Complimentary breakfast

**International travelers:** If you will not be renting a vehicle this hotel only offers free shuttle to and from airport. Lafayette has two options for shuttle to and from Training Center: UBER or Power Electrical Taxi #337-534-0188 – licensed and insured.

➤ **Hampton Inn**

400 Spanish Town Blvd.

New Iberia, LA 70560

Phone: (337) 321-6700

- No shuttle service to and from Lafayette airport and no taxi service in area

➤ **Holiday Inn Express**

318 West Highway 90 Frontage Road

New Iberia, LA 70560

Phone: (337) 408-2700

- No shuttle service to and from Lafayette airport and no taxi service in area

➤ **Candlewood Suites**

2600 Highway 14

New Iberia, LA 70560

Phone: (337) 256-8113

- No shuttle service to and from Lafayette airport and no taxi service in area

## LAFAYETTE / NEW IBERIA AIRPORT INFORMATION

### Lafayette Regional Airport (LFT)

American Airlines, connecting to/from Dallas Ft. Worth (DFW)

Delta Airlines, connecting to/from Atlanta Hartsfield International (ATL)

United Airlines, connecting to/from Houston Bush Intercontinental (IAH)

## LAFAYETTE / NEW IBERIA CAR RENTAL

Alamo  
Hertz

Avis  
National

Budget  
Enterprise

## NEW IBERIA MAP

## MORGAN CITY AREA HOTELS

Lodging and transportation are not included in course fees.

➤ **Clarion Inn**

520 Roderick Street

Morgan City, LA 70380

Phone: 985-385-2200

Hotel Email: [la344gm@gmail.com](mailto:la344gm@gmail.com) (Kristy Gant – Mgr)

Reservations: (888) 465-4329

- LA CAT rate \$96 per night with breakfast (contact hotel directly to book via email or phone)
- Hotel will provide airport shuttle service from MSY or LFT. Contact hotel directly to setup via email. Cost is \$300 round trip via LFT or MSY airports.
- Shuttle service to and from hotel to training center has limited service, call to confirm (\$25/day)
- Full Service Restaurant and Cocktail Bar

**International Travelers:** We recommend lodging at this hotel for shuttle service if you will not be renting a vehicle. There is limited taxi service in area. **NOTE:** Hotels do not accept cash. If hotel reservation is not prepaid a credit card will be required at check-in. Recommend that hotels are prepaid to avoid problems.

**The following hotels do not offer any shuttle service and have limited taxi service in area:**

➤ **La Quinta Inn & Suites**

2018 Allison Street

Morgan City, LA 70380

Phone: (985) 300-0200

➤ **Hampton Inn & Suites**

6365 Highway 182 East

Morgan City, LA 70380

Phone: (985) 221-4421

➤ **Holiday Inn Express**

704 Martin Luther King Jr Drive

Morgan City, LA 70380

Phone: (985) 300-5300

➤ **Amelia Extended Stay & Hotel**

111 Cajun Way

Morgan City, LA 70380

Phone: (985) 631-2220 / Rates: (985) 464-4004
