JOB SITE SERVICES & TRAINING

JOB SITE SERVICES

**SITE CALIBRATION
LOAD DESIGN FILES
MACHINE SITE VERIFICATION**

**JOB SITE VERIFICATION
FIELD DATA COLLECTION
VOLUME CALCULATIONS**

SITE CALIBRATION

SITECH Louisiana can provide the site calibration for your next work site. We will perform base station setup and use the existing control to create your site calibration. Increase your accuracy and productivity with the optimal site setup provided by the pros. Put our experience to the test.

LOAD DESIGN FILES

SITECH Louisiana will travel to your site and import machine control data files onto your Trimble guided machines and data collectors. We know Trimble and we know how to make our products work best for you.

MACHINE SITE VERIFICATION

No matter how good the control, site calibration or data model has been prepared, if your machine is not tuned properly it will result in poor quality operations. Our Trimble certified staff has the experience to verify your machine is performing optimally. Let us verify the accuracy of the machine by validating machine measurements with control, measuring blade wear and performing machine valve calibrations if necessary. Who better than the Trimble authorized dealer to ensure the accuracy of your Trimble guided machines?

JOB SITE VERIFICATION

The original ground topographic survey for projects are often outdated or incomplete. Errors and/or omissions in the original ground survey limits the precision of the 3D model. SITECH Louisiana will travel to worksite for field verification and perform a tie down survey to collect the point information needed to complete an accurate and profitable 3D model. Quality Control reporting available upon request.

FIELD DATA COLLECTION

Data collection required to process topos and as-builts can be very time consuming. We realize that your company may not have the time or resources available to spend collecting this data. We have the solution for you. Let our experienced staff use a variety of Trimble construction staking products to gather this information for you. It frees up your time and you can be sure the data will be reliable.

VOLUME CALCULATIONS

Whether it's our points or yours we have the powerful Trimble Business Center - HCE software and Trimble certified users available to process the data and produce accurate volume calculations. Let us quantify your next stockpile or work productivity.

TRIMBLE CERTIFIED TRAINING

TRIMBLE CERTIFIED TRAINING

Our training service is conducted by our own in-house Trimble certified trainers. Experienced as contractors using construction technology, our Trimble certified trainers have a training course to suit your individual needs. We provide a structured training solutions that will allow your staff to build the confidence and knowledge needed to be productive with your Trimble product line. We provide training at our training site that includes classrooms and a working job site, at your offices, or on your job site! Partner with SITECH Louisiana's experts to create a customized training program.

DATA SERVICES

3D DATA PREPARATION CAD DATA CLEANUP

TAKE OFFS FILE CONVERSION

3D DATA PREPARATION

SITECH Louisiana, provides 3D data prep models. Our designation as a Trimble authorized dealer, in conjunction with an in-depth knowledge of the Trimble product line ensure that our models will be the most functional, efficient and precise. Model builders are Trimble certified Business Center - HCE trainers and users. We provide models for industrial developments, commercial sites, roads & bridges, subdivisions, golf courses, levees, utilities, etc. Pricing is subject to the complexity of the design. Upon request, models can be developed for any manufacturer or system type.

COMMERCIAL SITES

Estimates average \$100.00, depending in complexity, per acre and include:

- Drainage
- Sewer
- Utilities

SUBDIVISIONS

Estimates average \$40.00, depending in complexity, per lot and include:

- Pads
- Retentions
- Street rough grading
- Drainage
- Sewer
- Utilities

ROADS & CORRIDORS

Machine control data estimates average \$750.00, depending in complexity, per lane per mile and include:

- Finish grade
- Subgrade
- Tie into existing grade

MACHINE CONTROL DATA

Estimates average \$500.00, depending in complexity, per lane per mile and include

- Finish grade surface only

TAKE OFFS

Estimate: \$300 - \$500 depending on complexity

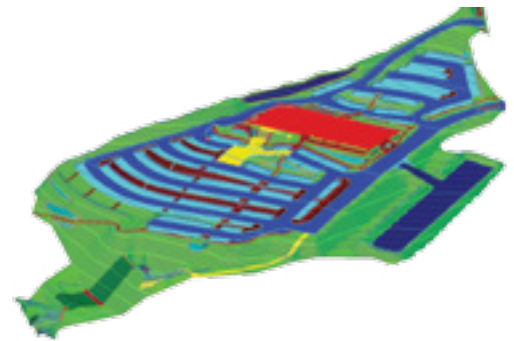

SITECH Louisiana, as a part of the connected office solution, uses Business Center - HCE's powerful tools to help collect, import, and do all the necessary cogo calculations quickly in order to produce volumes.

CAD DATA CLEANUP

Most cad files do not contain intelligent line work. Let SITECH Louisiana convert your cad file into an intelligent file so you can import data into your software without the hassle of cleaning the file yourself.

FILE CONVERSION

We will convert your job files to a compatible format to be used with your Trimble guided machines or Trimble data collectors. File formats include but are not limited to: csv, dxf, ttm, cfg, svl & svd.
